

Patients with Pain?

Chicago conference (April 11-14) has it all! Here's a sampling...

- *Ai Chi Ne (Wykle): Ai Chi Ne has been used extensively for all balance deficits (CP, Parkinson's, strokes, MS, brain traumas), neurological and motor skill deficits, geriatrics, victims of abuse, developmentally delayed, ADD and ADHD to adjust physical and emotional balance. The repetitive movements based on the effect of various types of music and rhythm calms and re-sets neurological patterns while assisting diaphragmic breathing.*
- *Ai Chi Seated (Donna Lewen, BA, ATRIC): The practice of Ai Chi can be modified based on the needs of different clients; not only on their physical needs but also on their emotional needs. In this course, integration will be used sitting in a chair. Unpredictable Command Technique patterning is also integrated, moving the head with the hands as well as opposite the hands, improving balance and assisting in fall prevention. Accented stretching is used to amplify the effects, stretching the entire myofascial lines during Ai Chi Seated.*

To Register for Chicago:

Click Here to Register - <http://www.atri.org/Register.htm>. You can click on www.atri.org to read complete course descriptions.

If you want to register by phone, please call 866-462-2874. Have your credit card and registration form in front of you with courses chosen.
