

1209 – Assistive Devices for Functional Gains from Danmar

Beginner / Pool Only

Sanibel, FL / Tuesday, June 23, 2020 – 4:30-5:30 pm – 1.0 credit hour

(Pool: 4:30-5:30 pm)

Faculty: Vicki Hames-Frazier, Adapted Aquatic Specialist

COURSE DESCRIPTION: Danmar Products has a complete line of assistive devices that can be used during aquatic therapy or aquatic exercise. The equipment provides stability and support as well as buoyancy. There is a basic line of flotation assistance equipment. There is also the option of having equipment custom made specifically for individual needs.

COURSE OBJECTIVES:

- 1) Identify the 11 basic pieces of therapy aids that can be used for aquatic therapy, exercise or instruction.
- 2) Determine how to put on the equipment correctly.
- 3) Identify aquatic therapies or instruction for which each piece can be utilized.
- 4) Demonstrate an exercise or therapeutic technique using a piece of equipment of your choice.
- 5) Explore customization of equipment.

FACULTY: Vicki Hames-Frazier, Adapted Aquatic Specialist, is an Aquatic Specialist and has been with the Washtenaw Intermediate School District for 35 years. In this role, Vicki coordinates, manages, and leads a team of therapists and paras providing aquatic services in all aspects of adaptive aquatics, including aquatic therapy and swim instruction.
